Abstract (en)

[origin: WO2010130519A1] A hand-held power tool has a housing comprising at least two separate and interconnected housing parts (2, 4), wherein one housing part forms a handle housing (4) for holding and guiding the hand-held power tool. The handle housing consists of a handle (5) and a fastening component (6). Said fastening component is connected to the other housing part and to the handle, and a vibration reduction element (8, 11, 15, 16, 17, 18, 24, 25) is arranged between the fastening component and the handle.
