Abstract (en)

[origin: WO2010131014A1] A seating arrangement comprising a group of seats arranged in rows, each row comprising at least two seats. At least some seats of the group are movably or removably mounted to reconfigure the group between a first configuration in which the seats of two successive rows face each other; and a second configuration in which at least two opposed seats of successive rows are reversed and at least two opposed seats of those successive rows are not reversed. At least two facing seats of those successive rows face each other and at least two reversed seats of those successive rows face away from each other. A walkway between backrests of the reversed seats provide user access to the facing seats.
