Abstract (en)
[origin: WO2010130559A1] The invention relates to a support element for a door (1) of a household appliance, wherein the support element (6) is plate-shaped and at least some regions of which consist of a material having a low specific thermal conductivity. The support element is designed to receive at least one functional unit of the household appliance. The invention also relates to a door (1) for a household appliance comprising a support element (6).
