Abstract (en)
[origin: WO2010131954A1] Data centre comprising a building having at least a first floor for supporting ICT equipment, and cooling means for said ICT-equipment which is arranged to subject the said ICT- equipment to a cooling air flow from a cold aisle at a first side of the ICT-equipment to a hot aisle at a second side of the ICT-equipment opposite to the first side, wherein the cold aisle is directly or indirectly connected with at least one fan for cooling air, which fan is controllable such that its operation depends on a measured pressure difference between the hot aisle and a pre-selected one of the group comprising the cold aisle and a first room from which the cold aisle (10) receives the cooling air.
