Abstract (en)

[origin: EP2430933A1] The binding has a front holding device of a sole of a ski shoe (5), and a heel holding device (1) withdrawn from a ski and connected to the ski. The holding device allows withdrawing of a heel up to a predetermined height. The holding device comprises a connecting piece (4) connected with the heel of the ski shoe. A flexible tension member (3) is connected with a jumping ski (2) at an opposite side. The connecting piece is slidingly arranged on the tension member, which exhibits a device for height limitation of the connecting piece.
