Abstract (en)

A riding boot attachment (50) for use with a riding boot (14) includes a body member having a first surface, a second surface, and at least two openings for receiving the riding boot. The body member receives at least a portion of the riding boot and is shaped and configured to conform to a contour of the riding boot. The riding boot attachment also includes a sole (48) for engaging a stirrup, the sole coupled to the first surface of the body member, and a magnetic member (42) coupled to the sole.
