Abstract (en)

[origin: EP2431288A1] The object of the present invention is to provide a can model for processed foods or not, for use by food companies or others, consisting of a three-piece can (L), which has a cylindrical shape, wherein one of the ends is expanded (neck-out), thus top (3) and bottom (4) have different diameters, but within limits not to compromise rolling on flat surfaces and guides minimizing friction between the external part of the cylindrical body with the finish or artwork while rolling. Said can may also be piled up, since it is provided with different diameters top and bottom, which fit in when stacked.
