Abstract (en)
[origin: EP2431323A1] The system has truck (6) with a load fork (7), pallet load from a flat line and/or metal shipping container, and storage location in base camp and/or load shelf. A transceiver (5) arranged on fork prong (11) of load fork of truck transmits/receives information from transponders arranged in pallet load and storage bin. The transponders are arranged in middle region of bearing surface of pallet load and in range of a center line of the storage location with respect to a direction of approach of truck.
