Abstract (en)
According to the invention there is provided in combination a pair of stabilisers for respectively opposite ends of a moveable elongate blade of a mechanical excavator of the type having a moveably mounted digger arm remote from the moveable blade and a tool-carrying end for carrying e.g. an excavator bucket on the end of the arm, the stabilisers each comprising or including a blade engaging portion adapted to be releasably secured onto or into a respective end of the blade, the blade engaging portion supporting an end structure, and a resiliently deformable foot portion forming part of the end structure, the foot portion being adapted to, in use, and in combination with the corresponding foot portion of the other stabiliser, prevent the lowermost edge of the blade from touching the ground when the blade is lowered theretowards.
