Abstract (en)
[origin: WO2010134031A1] The present disclosure relates to a connection device (10) for a helmet (12) for connecting a first element (16) of the helmet (12) to a second element (14) of the helmet (12). The device (10) includes a base body (20) apt to be associated with the second element (14), and a slider (22) inserted into a corresponding seat (26) of the base body (20). The slider (22) is at least partly elastically deformable and includes an engagement element (23, 123) which engages with a portion of said first element (16).
