Abstract (en)  
[origin: WO2011134447A1] The invention relates to a device for shaping a workpiece (1), in particular for shaping a motor vehicle sheet metal part, preferably a motor vehicle outer skin part, comprising a slide arrangement (2) for actuating a drawing/stamping tool. The slide arrangement (2) comprises a drive (3), a slide (4) that is driven by the drive (3), and a tool (5) that is carried by the slide (4). Said device is characterized in that the slide arrangement (2) is designed for an at least two-stage deformation of the workpiece (1) in one operation and also comprises the combination of two drives (15, 16) which act successively on the slide (17 and/or 18).
