Abstract (en)
[origin: US2010294622A1] A method of transporting containers, each comprising a body having a bottom and, at its opposite end, a mouth, the method comprising the steps of: supporting each container over a portion only of its bottom by means of a support that is movable with the container, and centering the mouth of the container on a container travel path, the centering being provided by clamping a portion of the container in the neighborhood of its mouth; and moving the containers as supported in this way.
