Abstract (en)
[origin: WO2010135545A1] A surface treatment for a protective plastic film and/or laminate is disclosed Suitably, the surface treatment includes coating a major surface of the plastic film or laminate with a curable coating formulation wherein the one or more of the coating ingredients are diffused or migrated at least partially into the plastic film or plastic laminate The migration of coating ingredients creates a gradual transition layer from the plastic film to the coating layer and leads to unique properties Optionally, the surface treated plastic film is laminated to a release liner coated with a pressure sensitive adhesive (PSA) to form the aforementioned laminate
