Abstract (en)

[origin: WO2010133480A1] The present invention relates to a washing machine (1) having a body, a drum (2) wherein the laundry is placed and which rotates around a horizontal axis, a motor which moves the drum (2), a tub wherein the drum (2) moves, and a shaft (3) which transmits the movement received from the motor to the drum (2) and determines the rotational axis (E) of the drum (2), and balancing units (5) which are fixed at the front and back of the drum (2) concentrically with the drum (2) and have a hollow annular shape, and wherein compartments (4) are located.
