Abstract (en)

[origin: WO2010133335A1] The present invention relates to a method for determining a quantity of a free-flowing substance metered into a body that is to be filled, wherein a terahertz impulse is generated that passes through the body to be filled and through the metered amount of the free-flowing substance received in said body, and wherein the metered quantity of the free-flowing substance is determined from a propagation time of the terahertz impulse.
