Abstract (en)
[origin: WO2010134983A1] Embodiments of the invention relate to hosting a competition on a computing device, wherein the competition allows participants to select a first set of predicted winners for a predetermined series of matches in a tournament and a second set of predictions for winners if one or more of the first set of predicted winners are eliminated earlier than predicted. The competition may be implemented in any suitable computing system environment, including, but not limited to, a web-based competition hosted on a remote server, a private or company-based competition hosted on a private or company computer.
