Abstract (en)

[origin: EP2433808A1] The method involves integrating covering products (1.1.1-1.1.3) with regionally aligned attachments (2.1.1-2.1.3) in printed products (4.1.1-4.1.3) in a combining device (4). The integrated covering products (1.2.1-1.2.3) are integrated with target group-specific attachments (3.1.1-3.1.3) in the integrated printed products (5.1.1-5.1.3) in another combining device (5). The integrated target group-specific attachments (3.2.1-3.2.3) are attached to the printed products provided with the covering products and the aligned attachments downstream to the former combining device. An independent claim is also included for a device for manufacturing individually assembled printed products.
