Abstract (en)

[origin: EP2433809A1] The data page (2) has a rigid layer (17) and a band-shaped connecting link (3), where the layer is provided for receiving the data. The connecting link is firmly connected with an area with the layer. The security features (4) are partially extended from the area in another area in the connecting link and are partially different from data page to another data page. An independent claim is also included for a method for manufacturing a data page.
