Abstract (en)
[origin: EP2433880A1] The container has an inner container made of plastic, and a sheet metal part (35) including a frame contact section for electrical conductive connection with a frame surface. A contact conductor section of the metal part extends within an accommodation chamber (38) formed in a support bracket. The contact section has a contact surface assembly with a bottom contact surface and a stack contact surface (49). The stack surface is connected with the bottom surface over a contact surface offset (50) and arranged above the bottom surface in a direction of a container vertical axis.
