Abstract (en)
[origin: EP2434046A1] The invention relates to a laundry machine (1), especially to a domestic laundry machine, comprising a door (2) to open and close an inner space (3) of the laundry machine (1), wherein the door (2) comprises at least one frame (4) and at least one transparent window (5) held by the frame which window (5) allows to inspect the inner (3) of the laundry machine (1) when the door (2) is closed. To improve the appearance of the laundry machine and to conceal parts of the inner of the laundry machine in an easy way the invention proposes that the door (2) comprises at least one intransparent cover element (6) adapted to partially conceal a region of the inner (3) of the laundry machine, so that only a part of the inner (3) is inspectable from the external when the door (2) is closed.
