Abstract (en)

[origin: EP2434063A1] The drain outlet has an inlet port (12) inserted into an opening (5) and terminated above a sump part engaging a partial region of a bottom part (3.1). A wall surrounds the inlet port. The partial region is provided with an overflow edge (16). A siphon section adjacent to the overflow edge of the wall is provided with a water level chamber. The siphon section is formed in a circular section with elevations and depressions. The siphon section surrounds the sump part in a partial circuit and terminates at a drain port (4).
