Abstract (en)

This invention relates to a fence (1) comprising at least two hollow fence posts (2), between which at least two crossbeams (3) extend, wherein each crossbeam (3) fits into an opening (4) provided in the fence post (2), a plate-shaped blocking element (5) extending into the cavity of the fence post (2) which is provided to block the crossbeams (3) against displacement, wherein the crossbeam (3) is provided in its external circumference with at least one recess (6) which lies within the hollow inner area of the fence post (2) and wherein the plate-shaped blocking element (5) is movable between a first position and a second position in which the crossbeam (3) is blocked in place.
