Abstract (en)
[origin: EP2434082A2] The windowsill panel (3) has a base (5) provided with an upper surface (12), a lower surface, two side faces in the direction of a width extension, front and rear end surfaces in the direction of a longitudinal extension. A support profile (13) is arranged on the upper surface, for supporting a window (2) or a door. The height (16) of closure elements (14) arranged on the two sides is greater than the height of support profile while extending approximately from the front end surface to a rear surface of the support profile.
