Abstract (en)

[origin: EP2434203A2] The device (1) has a lighting block (10) including a hollow base (13) housing a light source, and a bracket (20) with a lateral wall (26) that is distinct from a fixation part (21). A securing unit is provided on the bracket for fixing rigidity of a junction box (50) against the lateral wall of the bracket, so that a cable outlet opening of the junction box is extended opposite to a cable inlet opening (27) of the bracket.
