Abstract (en)

[origin: WO2010136674A2] The invention relates to a piece of jewelry (2), including: a decorative element (4) such as a precious stone; a bezel (3) including a body (5) and bored with at least one hole (12) defining a longitudinal direction (L), the body (5) having claws (8) mounted thereon for setting said decorative element (4); a wire-like mounting (16) on which the bezel (3) is mounted, said wire-like mounting (16) extending longitudinally through the body (5) of the bezel (3) and passing through the hole (12). The piece of jewelry (2) is characterized in that the wire-like mounting (16) has a bore (17) located in the body (5), in that it further includes an oblong stopping element (22), which extends transversely in the body (5) while passing through the bore (17) formed in the wire-like mounting (16), and in that the stopping element (22) is engaged with stopping surfaces (13) formed in the body (5).
