Abstract (en)
[origin: WO2010138072A1] The present invention relates to a device for storing a notebook computer at a horizontal working surface (2) with an underside (3), such as a writing table or working table. The device (1) has at least one storing surface (4) arranged to hold the notebook computer. The device (1) further comprises a rotatable and pivotable device (5) on which the storing surface (4) is arranged, the rotatable and pivotable device (5) being arranged to be mounted on the underside (3) of the working surface by means of at least one fastening means. The storing surface (4) is horizontally rotatable by means of the rotatable and pivotable device (5) around a vertical axis of rotation (V) so that the storing surface (4) can be rotated in under the underside (3) of the working surface; and the storing surface (4) is further vertically pivotable by means of the rotatable and pivotable device (5) around a horizontal axis of rotation (H) so that the storing surface (4) can take a substantially vertical position and a substantially horizontal position, and wherein the vertical axis of rotation (V) and the horizontal axis of rotation (H) intersect. The invention further relates to a system comprising such a device (1) and also comprising one or more containers for recycling purposes arranged at the device (1).
