Abstract (en)
[origin: WO2010136210A2] The invention relates to a device (100) for cutting food, such as fruit and vegetables, comprising a cutting part (2) provided with several blades (1) and an actuation part (3), said parts being mounted, by means of a pivot bearing (9), in a manner such that they can pivot counter to each other, and the actuation part (3) is pressed against the cutting part (2) for cutting the goods which are to be cut. Said device also comprises a cover part (5) for placing on a receiving container (6) for the cut goods, said cover part (5) having an opening (7) which has a passage (8) for the cut goods. According to the invention, the pivot bearing (9) is housed in the opening (7). The invention also relates to a multi-functional device for the kitchen, comprising a device (100) for cutting food, for example, fruit and vegetables.
