Abstract (en)

[origin: WO2010138050A1] A packaging material comprising a plurality of magnetisable portions thereon is disclosed, comprising at least two magnetisable portions per package to be formed from the packaging material, wherein the at least two magnetisable portions, for each package to be formed, provides each a magnetic mark carrying a magnetic field pattern such that position and orientation information related to finishing of the respective package is provided. A method for finishing packages from a web of such packaging material is also disclosed. The method comprises reading position information from the magnetic marks; cutting the web into parts to form the packages; forming the parts into an intermediate product; filling the package with content; and sealing the package, wherein the any of the cutting, forming, and sealing is performed based on position information read from the magnetic marks.
