Abstract (en)

[origin: WO2010139396A1] The invention relates to a position marking that can be connected to an object, distinctly identifying a designated region of a surface of the object, such that said region can be clearly differentiated from other regions of the surface. The invention further relates to the use of the position marking according to the invention for identifying surfaces for the purpose of identifying and/or authenticating, and to a method for detecting characteristic radiation patterns, preferably for the purpose of identifying and/or authenticating an object.
