Abstract (en)
[origin: EP2436295A2] The appliance e.g. vacuum cleaner (1), has a cover element (7) for covering an electromotor (4) i.e. fan motor, where portions of the cover element is made from a composite material e.g. plastic and leather. The cover element guides airflow (8). The cover element comprises a core element surrounding a coating element. The core element and/or the coating element are made from the composite material. The cover element is produced by injection molding process. A dust room (3) is located in a housing (2), and a change filter bag is arranged in the room, which filters dust and/or dirt particle.
