Abstract (en)

The present invention relates to a multi-filament product (10). The multi-filament product (10) comprises filaments (16) a having copper alloy layer (14) with annealed microstructure and a steel alloy core (12) with drawn microstructure. Furthermore, the filaments (16) in the multi-filament product (10) are coated with an electrical isolation coating (46). The present invention also relates to the use of the multi-filament product as heating element. The multi-filament product presents good conductivity, durability and strength.
