Abstract (en)

[origin: EP2436845A2] The arrangement has a bearing surface for receiving vertical compressive forces from the component (4) and another bearing surface for receiving compressive forces in the clamping direction of the clamping elements (17). The two bearing surfaces of the structure are made of polytetrafluoroethylene, polyethylene, nylon, polyethylene terephthalate or a polyacetal homopolymer. The mounting part is made of concrete or steel.
