Abstract (en)  
[origin: EP2436848A2] The structure has a supporting profile arrangement attached to a post-bar-structure and accommodating flat peripheral attachment elements. The arrangement consists of a support profile (10), and is attachable to the post-bar-structure at right-angles. The support profile is provided at a side facing the post-bar-structure, and attachment bars (14, 15) are provided at the side. The attachment bars are arranged below an acute angle to a contact surface of the post-bar-structure. The support profile is designed as a profile rail or as hollow profile rail.
