Abstract (en)

[origin: WO2010139497A2] The invention relates to a dishwasher, in particular a household dish washer, comprising a control device (9) for carrying out at least one dishwashing program, and an adding device (10), which can be filled with a cleaning agent, rinse aid and/or another additive and which can be closed by means of a closing element (11). The closing element (11) of the adding device (10) is at the same time designed as the main switch, with which the control device (9) can be turned on to carry out at least one dishwashing program when the closing element (11) is moved into the closed position.
