Abstract (en)

[origin: WO2010139566A1] The invention relates to a method for producing a plastic container having a container wall provided with a barrier foil, comprising the following steps: forming a foil body from a barrier foil, the shape of which corresponds to at least part of the container wall of the plastic container to be produced, arranging the foil body in an injection mold, applying a first plastic layer onto a first face of the foil body that corresponds to an inside or outside of the plastic container, and applying a second plastic layer onto a second face of the foil body that corresponds to an outside or inside of the plastic container, and to a plastic container comprising a container wall having a barrier foil, wherein the barrier foil is arranged centrally between an inside and an outside plastic layer.
