Abstract (en)
[origin: WO2010139681A2] A cladding system (1; 100) for external walls of buildings is disclosed, comprising a support element (2) designed to be fixed to a masonry wall (P), a finish panel (3) designed to be fixed to the support element (2) at a certain distance from the masonry wall (P), in such a way to generate at least one air space (I1, I2, I3), at least one insulation panel (6) arranged between the masonry wall (P) and the finish panel (3), and spacing elements (25) provided on said support element (2) to space out said at least one insulation panel (6) from wall (P) and finish panel (3), in such a way to generate at least two air spaces (I1, I2, I3).
