Abstract (en)
[origin: WO2010139525A2] The present invention relates to a header (100) for a heat exchanger, which comprises a plurality of flat tubes (112) arranged in a longitudinal direction. The header (100) has a bottom and a lid. The bottom has a plurality of openings for coupling the header to the plurality of flat tubes (112). The lid is arranged opposite of the bottom and connected to the bottom, at least at the edges extending in the longitudinal direction, in a fluid-tight manner. The lid has a plurality of transverse channels on a side facing the bottom, which are arranged opposite of the plurality of openings, and a longitudinal channel extending in the longitudinal direction.
