Abstract (en)

[origin: WO2010139718A1] The present invention relates to a device (10) for simulating an environment of a infrastructure supervision system (11) generating a three-dimensional representation of the infrastructure using real data from real devices (20) supervised by the supervision system (11) completed with simulated data from simulation models (101, 102, 104, 105, 121, 118) that make up the simulation device (10). The invention is suitable for use in supervised infrastructures such as transport networks, factories, and public infrastructures.
