Abstract (en)

[origin: DE102010047381A1] The ski (1) has a ski connection (2) that is arranged at an upper side of a ski part (3) and a clamping device (4), which is extended from a range of an end of the ski connection up to an end range of the ski. A support (6) is arranged between the ski and the clamping device. The support is displaced along a longitudinal axis (L) of the ski such that a contact point of the ski is adjusted.
