Abstract (en)

[origin: EP2439334A2] The mixer bar (10) has a connection side including a connection surface for fastening to a rolling surface, where the bar is formed as a forging part. A cross-sectional profile of the bar is varied in sections transverse to a tool traverse direction. The connection side includes a separated or continuous fastening surface (11) protruded over a recess or bevel (12) in side surfaces. The fastening surface comprises fastening edges at opposite mixer bar sides. A protrusion (16) is arranged in the feed direction before a tool holder (22).
