Abstract (en)

[origin: EP2439361A2] The door lock device has a close-movement actuating type lock unit (1) that is operated by a panic bar. A closed-sided nut lever (3) is installed for receiving a fastening nut within the side of a recess (6) formed in the lock unit. The nut lever is of L-shaped and is equipped with two lever arms (4, 5). The lever arm (5) is extended radially and the other lever arm (4) is extended tangentially with respect to a locking nut (2). Two through holes (7, 8) are formed in the height direction (9) of the lock unit.
