Abstract (en)

A cable (100) that comprises a cable core that includes at least one conductor (120) that is surrounded by insulation. A barrier layer (110) substantially surrounds the conductor's insulation. The barrier layer (110) may include a plurality of shielding segments (130). Each of the shielding segments (130) extends substantially around a circumference of the barrier layer (110). The shielding segments (130) may be spaced from one other to form a discontinuous shield around the conductor (120).
