Abstract (en)  
[origin: EP2439814A2] The connecting terminal (50) has housing (1) that includes actuating element (3) coupled to base portion (2) and lockingly engaged in open and contact positions (6,7). An insulation-displacement contact (4) is configured to connect a cable, and latching device (8) is configured to contribute to interlocking of base portion and actuating element in open position. A latching device (9) is configured to contribute to another interlocking of base portion and actuating element in contact position.
