Abstract (en)

[origin: WO2010142351A1] The invention relates to a dishwasher, especially a domestic dishwasher (1), comprising a hot water inlet device (51) for the inlet of hot water (WW) from an external hot water supply (WA), a cold water inlet device (52) for the inlet of cold water (KW) from an external cold water supply (KA), and a program control device (19) for controlling a wash cycle of a selected dishwashing program for cleaning dishes. The program control device (19) has a first operating mode in which at least one wash program (SP1) can be activated that specifically provides for a supply of hot water (WW) from the external hot water supply (WA) during at least one partial wash cycle (RG) of a wash cycle (SG1), and/or a second operating mode in which at least one wash program (SP2) can be activated that specifically provides for a supply of cold water (KW) from the external cold water supply (KA) only during at least one partial wash cycle (TG) of a wash cycle (SG1).
