Abstract (en)

[origin: WO2010142922A1] The invention relates to a ramp (1) that includes three longitudinal beams (5, 6) each including at least two inflatable tubes (8) braced by inflatable tubes of side and lower struts arranged as closed stiffening inflatable frames (11, 18) having a polygon shape at the inflated state and surrounding the longitudinal beams (5, 6) to which the tubes of the stiffening frames (11, 18) are connected by connection means and inflation means.
