Abstract (en)
[origin: WO2010142454A1] The invention relates to a passenger seat device, in particular an air passenger seat device, comprising a seat surface unit (37.2) that is assigned to a first row of seats (12.2) having a plurality of passenger seats (14.2, 16.2, 18.2). According to the invention, the passenger seat device comprises a comfort unit (44.1; 44a.1; 44b.1, 44b.2; 44c.1), which, in addition to the seat surface unit (37.2), in at least one usage position forms at least one first support surface (54.1; 54a.1; 54b.1, 54b.2; 54c.1) that is provided for supporting at least one body part of a reclined passenger.
