Abstract (en)

[origin: US2010307948A1] A product package includes a product receiving cavity formed from a first, heat shrinkable film and a second, non-heat shrinkable film sealed to the first, heat shrinkable film. The second film can be provided with indicia which remains intact following completion of the product packaging. In accordance with a method aspect of the invention, the package is produced utilizing a form, fill and seal system. In one embodiment, a soft, deformable refrigerated dough is packaged.
