Abstract (en)

[origin: CA2764730A1] The invention relates to a method and a device for sanitizing packagings at least sections of which are configured as closed packaging sleeves. The packaging is supplied with a sanitation product. While the sanitation process is carried out, the packaging sleeves are open in the region of both ends in the longitudinal direction of the sleeve and are transported through a sanitation tunnel. The packaging sleeves are supplied with the sanitation product inside the sanitation tunnel. Along the path of the sanitation tunnel, sanitation product flowing out from an open end section of a packaging sleeve is introduced into an open end section of an adjacent packaging sleeve.
