Abstract (en)

[origin: WO2010142676A1] The present invention relates to a conical packaging, in particular a pointed conical packaging (10), preferably for food, such as ice cream in wafers and the like, comprising a packaging wall that tapers conically starting from a removal end (10a) along a packaging axis (V), wherein the packaging wall has a tearing aid (16, 18) having a first material weakening (16) of the packaging wall material and having a second material weakening (18) extending at a distance to the first material weakening (16) in such a way that the first (16) and the second material weakening (18) define a tearable strip (14) therebetween, wherein the tearable strip (14) extends in the direction of the packaging axis (V) starting from the removal end (10a) of the packaging (10) with a tearable component and ends in a axially central area (A) of the packaging (10).
