Abstract (en)  
[origin: WO2010142589A1] The invention relates to a device (5) for supplying a product to a container-filling apparatus, including tubing (6) having at least one end provided with a spout (7) and an opposite end provided with a means for attachment to a supply line of the filling apparatus, and a plate (9) attached to the tubing and provided with a mounting (13) having one portion (15, 16) extending opposite the spout such as to support a container. The invention also relates to a filling apparatus comprising at least one such device.
